BINOJ RAJ R B

AI-Assisted Developer | Python Full Stack Developer

+91 7012609598 | binojrajr@gmail.com
github.com/Myselfbinoj | Thiruvananthapuram, Kerala

Professional Summary

Python Full Stack Developer with freelance and internship experience building web applications using Python, Django, Django REST Framework, React.js, TypeScript, and SQL. Develops responsive interfaces, REST APIs, authentication, and database workflows. Uses AI tools for development, debugging, refactoring, and documentation, with personal projects spanning content automation, learning tools, e-commerce, and management systems.

Technical Skills

- **Languages:** Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
- **Frontend:** React.js, Tailwind CSS, responsive design, reusable components, state management
- **Backend:** Django, Django REST Framework (DRF), Flask, REST APIs, authentication, CRUD
- **Databases:** MySQL, PostgreSQL, relational database design, data modeling
- **Development Tools:** Git, GitHub, Postman, VS Code
- **AI Tools:** ChatGPT, Claude, Cursor, GitHub Copilot, prompt engineering, LLM workflows

Professional Experience

Freelance Python Full Stack Developer
B-connectEd Educational Platform | 2026 - Present

- Developed an online tuition platform using React.js, a TypeScript-ready component architecture, Django, DRF, Tailwind CSS, and MySQL.
- Implemented student management, authentication, course tracking, administrative dashboards, and REST APIs.
- Translated stakeholder requirements into responsive features and relational database structures.

Junior Python Full Stack Developer Intern
Druv 360 Entrepreneurs Hub Pvt. Ltd., Kochi | 2026 - Present

- Developed frontend and backend modules for a Church Management System covering families, members, dues, receipts, ledgers, reports, building funds, and payment status.
- Completed the Mindraay project frontend; backend development is in progress.
- Support ongoing backend development for Service Connect, a nearby-services project.
- Built reusable React.js interfaces, integrated Django REST APIs, participated in code reviews, and followed collaborative Git workflows.
- Used ChatGPT, Claude, Cursor, and GitHub Copilot for debugging, refactoring, and documentation.

Associate (Client: Amazon)
Sutherland Global Services | 2024 - 2026

- Resolved client technical and operational queries with clear documentation and timely communication.

Associate (Client: Amazon)
Randstad India Pvt. Ltd. | 2023 - 2024

- Supported operational workflows, team coordination, and delivery of client requirements.

Desktop Support Engineer (Client: Cognizant)
Balbhas Business Sysnomics Pvt. Ltd. | 2023

- Provided hardware and software troubleshooting, system maintenance, and end-user technical support.

Personal Projects

Built the following personal projects using AI-assisted development.

Automated Script Video and Audio Generation

- Developed an automated workflow for generating scripts, video, and audio content.

Combination Password Cracker

- Built a tool to generate and test password combinations.

Typing Speed Checker and Debug Learner

- Created tools for checking typing speed and practicing debugging skills.

Kids Word Game

- Developed a word game for children to practice vocabulary.

Skywatcher Aircraft Monitoring

- Built an application for monitoring aircraft information.

Online Fashion Store

- Developed a fashion e-commerce project as part of an AI-assisted web development portfolio.

Library Management System

- Implemented book inventory, member registration, issue and return workflows, authentication, and reporting using relational database models.

Student Management System

- Developed a CRUD application for student records, authentication, and structured relational data management.

React Profile Todo and Resume Tools

- Built reusable components, editable task workflows, profile interfaces, responsive layouts, and resume-scoring UI concepts.

Education and Certification

Advanced Specialization Certification in Python Full Stack Development
INMAKES INFOTECH PVT. LTD. | 2025

Bachelor of Engineering in Electronics and Communication Engineering
Anna University | 2018 - 2022
